

Moderation Layer - Frontend

The screenshot shows the VS Code editor with the following components:

- EXPLORER:** File tree showing the project structure, including `moderation.test.js`.
- moderation.test.js:** Contains Jest tests for the moderation engine, including tests for oversized text, PII detection, and decision building.
- TERMINAL:** Shows the command `npm run dev` and the output of the development server, indicating it is running on `http://localhost:4000`.
- CHAT:** A sidebar with a chat interface for the "FRONTEND FOR MODERATION LAYER", including a "How to use" section and a list of endpoints.

The screenshot shows the "Moderation Layer Demo" web application running in a browser at `localhost:4000`. The application has the following sections:

- Enter text to moderate:** A text input field containing the text "Contact me at alice@example.com".
- Or upload a text file:** A section with a "Choose File" button and a "No file chosen" message.
- Choose action:** A dropdown menu with "Moderate" selected.
- Run/Reset:** Two buttons to execute or reset the moderation process.
- Response:** A section displaying the results of the moderation, including "Decision: BLOCK", "Safe: false", "Reason: pii_cii_detected", and "Masked text:".
