BM25 — top result TC_064 "Remarks," score 18.97, because "Remarks" and "Master" appear literally in the query and the test case text. Pure keyword overlap.

Hybrid — same query, 50/50 weights. Key numbers to notice:

- **6 in both indexes, 0 BM25-only, 4 vector-only**
- That means: every result BM25 found, vector search *also* found — but vector search surfaced **4 additional test cases** that BM25 completely missed because they don't share exact keywords, just meaning.
- TC_064's score breakdown shows it clearly: BM25 100% (raw 18.97) + Vector 91.7% (raw 0.92) → Hybrid 95.9%. Both signals agreed strongly on the top result, which is why it stayed #1.

Look closely at TC_064's card: the badge at top says "Rerank Score: 0.0000", but the detail box right below it says "Groq Rerank: 0.5000." Those
