

Ai Browser Extension For Code Generation

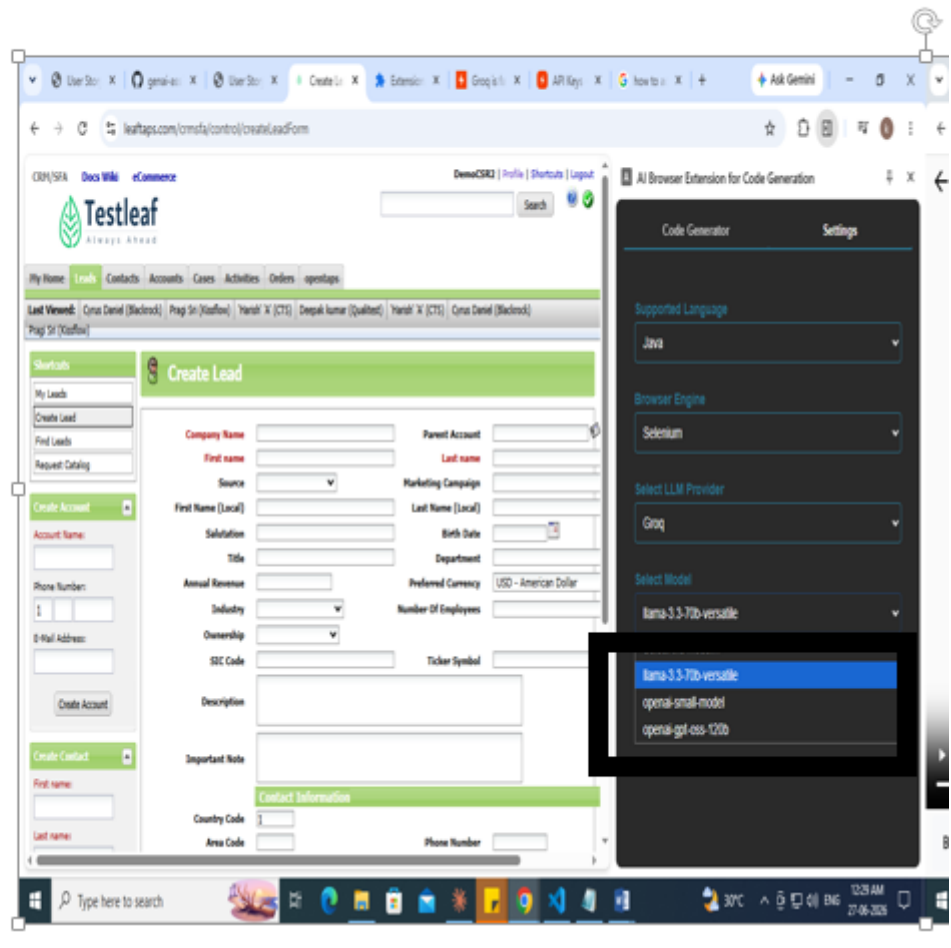

Code Generated for Java and selenium

The screenshot shows a web browser at the URL `leafapps.com/crmsfa/control/createLeadForm`. The page is a CRM application for 'Testleaf'. The main content area is titled 'Create Lead' and contains a form with various fields for creating a new lead. The form is divided into sections: 'Company Name' (First name, Last name), 'Source', 'Marketing Campaign', 'First Name (Local)', 'Last Name (Local)', 'Salutation', 'Birth Date', 'Title', 'Department', 'Annual Revenue', 'Preferred Currency', 'Industry', 'Number Of Employees', 'Ownership', 'SIC Code', 'Ticker Symbol', 'Description', and 'Important Note'. There is also a 'Contact Information' section with fields for Country Code, Area Code, Extension, and Phone Number. A sidebar on the right contains an AI extension titled 'AI Browser Extension for Code Generati...'. The sidebar has a 'Reset Chat' button and a chat area with a scenario outline: 'Create a new lead'. The chat area also includes a 'Generate' button.

Code Generated for Java and selenium

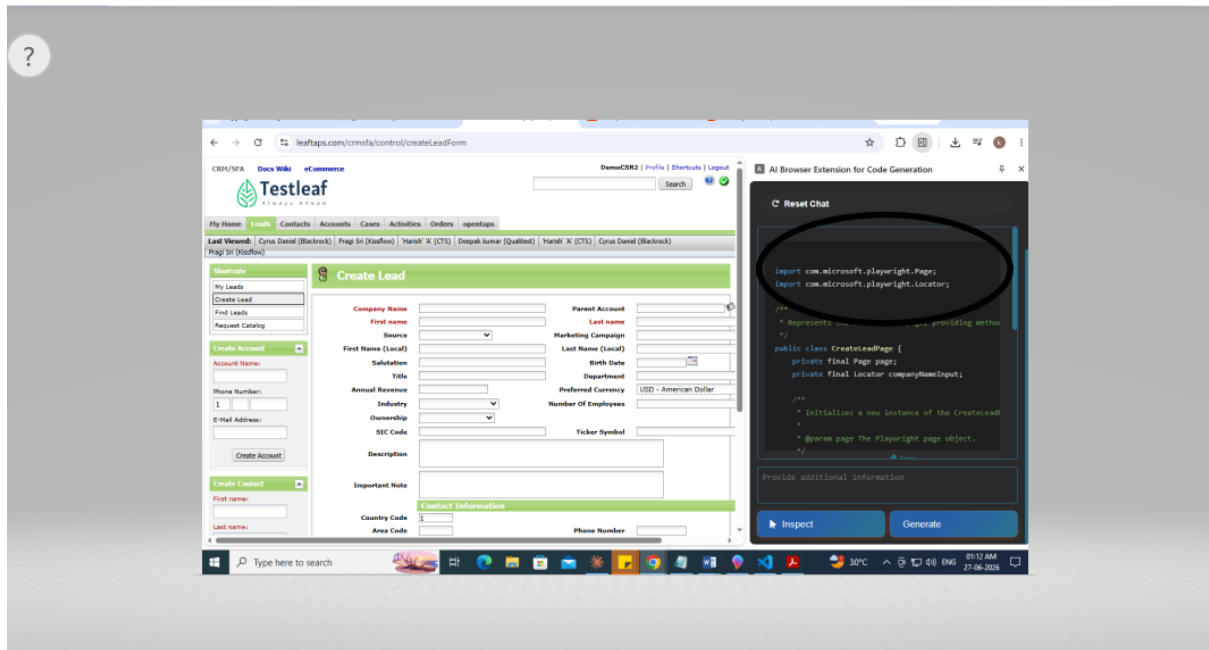

The screenshot shows a web browser displaying a login page. The page has a large, stylized logo at the top. Below the logo, there are input fields for 'Email' and 'Password'. A 'Forgot your password?' link is next to the password field. A 'LOG IN' button is at the bottom. A sidebar on the right contains an AI extension titled 'AI Browser Extension for Code Generati...'. The sidebar has a 'Reset Chat' button and a chat area with a scenario outline: 'Unsuccessful login'. The chat area also includes a 'Generate' button.

Adding Third Model to the Ai extension

Tried with java + playwright – Not supported at the moment
So working to include this combination

Page Object code with playwright with java combination

Feature file code with playwright java
